<p><b>About me</b></p>	<p>Teaching for 4 years Year Group Leader Trust Geography Leader Beginning NPQSL in Autumn 2023</p>
<p><b>Geography is special because:</b></p>	<p>Geography provides children with the opportunity to study our world with a microscopic lens. In our current climate, it is crucial that our children are able to understand the human and physical processes of our planet, as well as empathising with the positives and negatives we are facing. Geography is a wonderful subject that develops curiosity and inquisitiveness; this is something that all children should experience during their time in education. Geography is about understanding the complexity of our world, appreciating the diversity of cultures that exist across continents. This will support with the social and moral</p>

	development of our pupils, enabling them to become conscientious citizens who are aware of the world around them.
<b>Train / Work Somewhere Special</b>	I am passionate about working with the next generation of teachers as I feel that I can share my own experiences in my career so far, enabling the future generation of teachers to be reflective in order to progress in their new careers.
<b>Work Somewhere Special</b>	Teaching is a powerful tool to raise the next generation into a world that needs fantastic and enthusiastic individuals. No day is the same and simply being in the classroom is by far the best career path; not only do the children learn from you, but you learn from them as well!
<b>Live Somewhere Special</b>	I adore running along the Plym Valley Trail, taking in the breath-taking views while also generating some endorphins too!
