<p>About me</p> <p>4 – 5 points</p>	<p>I joined Colyton in September 2022, having previously worked in Abu Dhabi and London. My degree is in Maths with Modern Languages and I can also play the piano. Outside teaching I also enjoy cooking, baking and reading.</p>
<p>Maths is special because:</p> <p><i>Approx. 100 – 150 words about your subject and curriculum related to the course</i></p>	<p>Maths is a universal language with which we can communicate ideas about the world around us as well as abstract concepts. Maths is often thought of as being just ‘numbers’ and ‘algebra’, but at its heart it is about spotting patterns, thinking logically and reasoning critically. Maths is everywhere: from money earning interest in a bank account to bees building efficient honeycombs. Mathematical knowledge underpins key concepts in numerous other subjects, including science, economics, music and art.</p>

<p>Train / Work Somewhere Special</p> <p><i>1 – 2 sentences about why you are passionate / enthusiastic about training and working with the next generation of teachers</i></p>	<p>Maths is such a vital subject, so it is important that we have specialists who can create the next generation of mathematicians, and promote a joy of learning maths to all students.</p>
