Introduction

Welcome to the South West Institute for Teaching (SWIFT), a partnership dedicated to developing exceptional new teachers. We are excited to have you join our Initial Teacher Training Secondary course in Computer Science. Our expert subject specialists have designed an enriching curriculum, carefully sequenced and aligned with the ITT core content framework. This course will prepare you to be an expert in evidence-based pedagogical practice; effectively manage the demands of the profession and exemplify the highest standards of professional conduct.

We know the first year in the profession is crucial, which is why we have created a tailored learning experience that will support you in building confidence in the classroom through a deep understanding of educational theory and practice.

As educational leaders, SWIFT takes pride in developing the next generation of outstanding teachers. Being a teacher is a real privilege that brings great rewards. On a daily basis, we are able to positively influence the lives of young people, helping them to grow and reach their true potential. Teaching allows us to positively impact young people's lives by helping them overcome obstacles to success and shape their futures, making secondary education the most rewarding profession.

We would like to wish you the very best as you embark on this rewarding teaching journey with us.

About our Courses

Aims

Our overall aim is to enable trainees to make the strongest possible start that leads to ever-deepening expertise across their career. Specifically, we want all trainees to:

Develop a high level of expertise in phase and subject(s).

Experience evidence-based training that brings together theory and practice.

Engage in critical analysis of research through our PGCE.

Belong to close-knit, supportive training communities.

Prioritise approaches to teaching that are inclusive of disadvantaged pupils and pupils with SEND and EAL.

Develop agency to bring about a fairer education for all pupils.

Be effectively prepared for the next phase of the trainees' career, including how to lead a good work life balance.

Strands

We use the five core areas of the Core Content Framework* (CCF) as our curriculum organisational rationale, referring to these as 'Core Curriculum Strands'. These strands are sequenced carefully across our curriculum, delivered through Provider- Led and Subject Knowledge sessions and explored further through observation and practice during school placements under the guidance of an expert mentor.

Strand 1: Behaviour Management and High Expectations (Standards 1 and 7 of the CCF)
Strand 2: Pedagogy (S2, 4 and 5)
Strand 3: Curriculum (S3)
Strand 4: Assessment (S6)
Strand 5: Professional Behaviours (S8)

*Initial teacher training (ITT): core content framework - GOV.UK (www.gov.uk) (https://assets.publishing.service.gov.uk/media/62a1b73fd3bf7f0368efbe3f/iQTS_Core_Content_Framework_June_2022_update.pdf)

Secondary Computer Science Course

Computer Science is changing every facet of our lives and it is vital that students gain an understanding of this to enable them to make informed choices as consumers of technology but also as future decision-makers be they software developers, engineers, doctors, solicitors or entrepreneurs.

Part of the National Curriculum since 2014, the understanding of what and how to teach Computer Science has rapidly developed. Through the course we will equip you to make this vital subject come alive for students, using the best research-informed approaches, that will inspire all learners and enable them to make sense of even the most complex aspects of the subject.

Computer Science Programme Modules

Phase 1: Principles and Fundamentals Autumn Term	1. The Computer Science Curriculum 2. Creating a Powerful Environment to Teach Computer Science 3. Effective teaching of Computer Science
Phase 2: Consolidating and Developing Spring Term	4. Assessment and Feedback in Computer Science
Phase 3: Moving to Complex Practice Summer Term	5. Adapting Computer Science 6. Enriching Computer Science

SWIFT Teacher Training Key Contacts

Absence Line | Abby Spearing | 01548 852641 Ext 2592

A trainee must notify the provider of any absence from the course, whether the absence relates to school placement or provider-led/subject knowledge sessions. Trainees must phone the absence line by 0830 on the day of absence and also on any subsequent days. If SWIFT Teacher Training have not been contacted by the trainee by 0830, they will contact the trainees named representative to confirm the safety of the trainee and ascertain why they are not in attendance. Please see our full Absence Policy for more details on reporting and absence certification.

	Long Placement	Teaching Practice	School
	Enrichment Placement	Teaching Practice	School
	Holiday		

Subject to change and holiday dates may vary depending on school placement.

We will keep you up to date with any alterations to the timetable.

Professional Etiquette During Training Sessions Online

	Arrive on time to all training sessions, including after breaks and lunchtime. Be seated and ready to start.
	Devices should only be used for making notes on sessions. Work emails and lesson planning should be completed at another time.
	Microphones off when the host is talking.
	Please ask questions in the chat. These will be addressed in the question section of the session. If you have any questions which are specific to you, please ask your mentor directly.
	Engagement. Please have your camera on, answering questions and taking part in surveys and being an active part of group discussions, including in breakout rooms.

Training Day

	Arrive on time to all training sessions, including after breaks and lunchtime. Be seated and ready to start.
	Devices should only be used for making notes on sessions. Work emails and lesson planning should be completed at another time.
	No talking during sessions.
	Please save questions to the question section of the session. If you have any questions which are specific to you, please ask your mentor directly.
	Engagement. Make sure you take an active part in sessions when appropriate eg group discussions and answering questions.

SWIFT Teacher Training ICONs

We use the following icons through our training:

	Thinking		Retrieval Practice		Trainee Teachers to Complete
	Timer		Deliberate Practice		
	Writing		Checklist		
	Reading		Questions		
	Discussion		Pupil to Complete		

Required Key Reading List | Computer Science

This document contains the pre-course reading list for your SWIFT Initial Teacher Training Course in Computer Science. Prior to the course starting in September 2024, you are required to engage with the following key reading.

Recommended Texts

1. Raspberry Pi Foundation, *Hello World*. Available at: https://www.raspberrypi.org/hello-world. Free computing and digital making magazine published by the Raspberry Pi Foundation, in conjunction with BCS and Computing at School. It is written by educators for educators and contains case studies, subject content, ideas and pedagogy. It is published three times a year and is free for educators to subscribe to and is also available online.
2. Harrison, A.J., 2021, *How To Teach Computer Science*. Woodbridge: John Catt Education
   Practical and accessible book outlining subject content, how to teach it and common misconceptions for each topic within the subject. The book also gives history and context that enable teachers to enrich their teaching. The book has broken down the subject of Computer Science into broad areas and gives information on how to teach about them. It also highlights common misconceptions in each topic and how to tackle them. Written by a computing teacher.
3. NCCE, *Isaac Computer Science*. Available at: https://isaaccomputerscience.org/login
   A website containing subject content for KS4 and KS5, linked to all the exam boards' specifications, along with practice questions. You can look at content by topic area or by specification point for a particular exam board specification. The practice questions are auto-marked and help with checking for understanding. As well as being a great tool to use with students, it is also useful for plugging knowledge gaps and getting an idea of where the subject is pitched. Isaac CS also do online courses for students to boost their knowledge.

You might also wish to familiarise yourself with the National Curriculum for Computing to give yourself an understanding of the content that you will teach in your initial teacher training year.

Additional Reading

- Department for Education, (2013) *Computing programmes of study: key stages 3 and 4.*
- Ofsted, 2022, *Research review series: computing*.

National Curriculum Subject Content

Reference: National curriculum in England: Computer Science programmes of study - GOV.UK (www.gov.uk)

Purpose of study

A high-quality computing education equips pupils to use computational thinking and creativity to understand and change the world. Computing has deep links with mathematics, science and design and technology, and provides insights into both natural and artificial systems. The core of computing is computer science, in which pupils are taught the principles of information and computation, how digital systems work and how to put this knowledge to use through programming. Building on this knowledge and understanding, pupils are equipped to use information technology to create programs, systems and a range of content. Computing also ensures that pupils become digitally literate – able to use, and express themselves and develop their ideas through, information and communication technology – at a level suitable for the future workplace and as active participants in a digital world.

Aims

The national curriculum for Computing aims to ensure that all pupils:

- can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation
- can analyse problems in computational terms, and have repeated practical experience of writing computer programs to solve such problems
- can evaluate and apply information technology, including new or unfamiliar technologies, to solve problems analytically
- are responsible, competent, confident and creative users of information and communication technology.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.

Subject content

Key stage 1

Pupils should be taught to:

- understand what algorithms are, how they are implemented as programs on digital devices,
- execute programs by following precise and unambiguous instructions
- create and debug simple programs
- use logical reasoning to predict the behaviour of simple programs
- use technology purposefully to create, organise, store, manipulate and retrieve digital content

- recognise common uses of information technology beyond school
- use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about online content.

Key stage 2

Pupils should be taught to:

- design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems and solve problems by decomposing them into smaller parts
- use sequence, selection, and repetition in programs; work with variables and various forms of input and output
- use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs
- understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration
- use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content
- select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information
- use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.

Key stage 3

Pupils should be taught to:

- design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
- understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem
- use 2 or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions
- understand simple Boolean logic [for example, AND, OR and NOT] and some of its uses in circuits and programming; understand how numbers can be represented in binary, and be able to carry out simple operations on binary numbers [for example, binary addition, and conversion between binary and decimal]
- understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems
- understand how instructions are stored and executed within a computer system; understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits
- undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users

- create, reuse, revise and repurpose digital artefacts for a given audience, with attention to trustworthiness, design and usability
- understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct, and know how to report concerns

Key stage 4

All pupils must have the opportunity to study aspects of information technology and computer science at sufficient depth to allow them to progress to higher levels of study or to a professional career.

All pupils should be taught to:

- develop their capability, creativity and knowledge in computer science, digital media and information technology
- develop and apply their analytic, problem-solving, design, and computational thinking skills
- understand how changes in technology affect safety, including new ways to protect their online privacy and identity, and how to report a range of concerns.

Computer Science Subject Knowledge Audit

Throughout this course, you must demonstrate continuous improvement in your subject knowledge to meet the required standards. Strong expertise in your subject is essential for effective teaching. You will show your knowledge partly through lesson observations, but also by completing the subject knowledge audit below at each assessment point during your training year. The audit's red-amber-green rating of course content will map your progress. This live document will serve as a professional tool that you can build on throughout the early stages of your teaching career.

	RAG Rating Key
S	Secure knowledge = I have good pedagogical content knowledge and would be able to teach it
D	Developing knowledge = I understand it, I need to study it further to be able to teach it
L	Limited Knowledge = I have little knowledge and have not seen it taught

Subject Knowledge	Pre-Course Knowledge	AP1 Autumn Term	AP2 Spring Term	AP3 Summer Term	Final Assessment Summer Term	Action Plan for Development
Dates		**18 November 24 to 2 December 24**	**3 March 25 to 24 March 25**	**28 April 25 to 12 May 25**

Computer Science Key Information

Facilitator: Michael Cronk

Email: michael.cronk@sw-ift.org.uk

Morning Sessions: 0930 – 1230

Afternoon Sessions: 1300 – 1600

Twilight Sessions: 1400 - 1530

Venue: To be confirmed

Address: To be confirmed

Telephone: To be confirmed

Please check timetable and the weekly bulletin as several of these sessions are online.

Times may be subject to change.

Computer Science Subject Knowledge Session Timetable

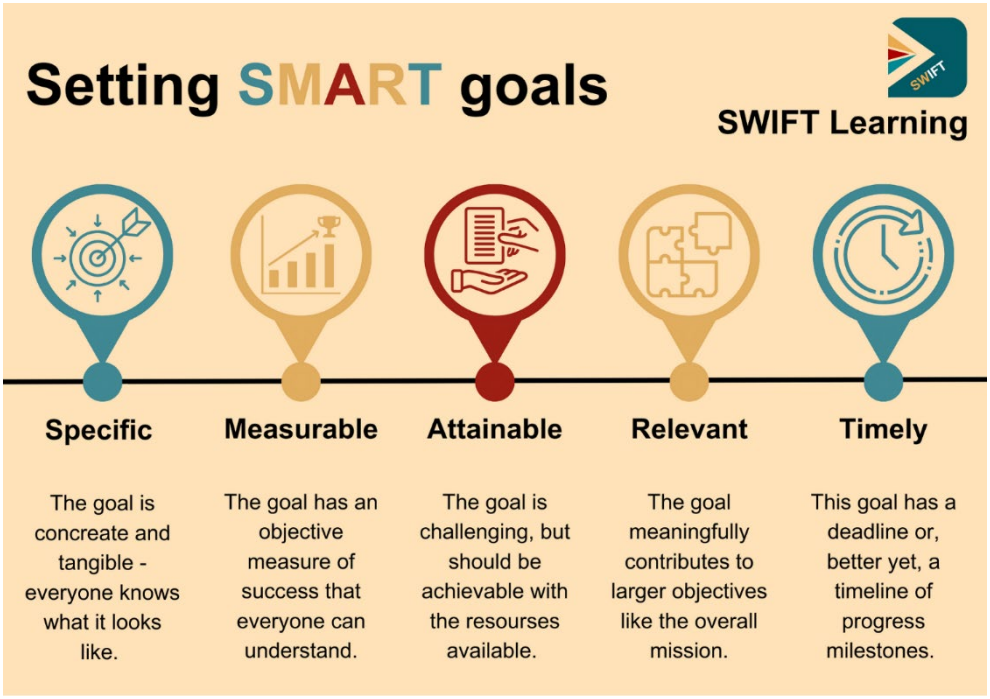
Week	Session Number	Theme 1 | The Computer Science Curriculum	Learn That	Learn How	Venue and Timings
1	1.1	Why study Computer Science? The role of Computer Science in the curriculum	3.5,3.6,3.8,3.10	3b,3e,3g,3h,3n	Friday 30 August 2024 Afternoon Online
2	1.2	The Computer Science curriculum, 4-18	3.3,3.5,3.6	3b,3h,3n	Friday 6 September 2024 Morning To be confirmed
	1.3	Hard choices: What knowledge should be taught in a secondary Computer Science curriculum?	3.3,3.5,3.7	3d,3c,3j	Friday 6 September 2024 Afternoon To be confirmed
3	1.4	Planning to develop Computer Science skills within the secondary curriculum	3.3,3.5,3.6	3a,3c,3h,3j,3n	Thursday 12 September 2024 Morning To be confirmed
	1.5	Planning an effective sequence of learning in Computer Science	3.3,3.7	3f,3h,3j,3k,3l,3n	Thursday 12 September 2024 Afternoon To be confirmed
	1.6	The role of Computer Science in growing cultural capital and challenging disadvantage	3.1,3.10	3c,(3q,3r)	Friday 13 September 2024 Morning To be confirmed
	1.7	Additional session if required			
		Theme 2 | Creating a powerful environment to teach Computer Science	**Learn That**	**Learn How**	
4	2.1	Establishing routines in a Computer Science classroom	1.1,1.4,7.1,7.2	1e,7h	Wednesday 18 September 2024 Twilight | 1530 – 1700 Online
	2.2	Motivating pupils to love Computer Science	1.1,1.2,1.6,7.6	1a,7o,7p	Friday 20 September 2024 Morning To be confirmed
	2.3	Addressing non-compliance in a Computer Science classroom	1.5,7.6	1e,7a,7p	Friday 20 September 2024 Afternoon To be confirmed

5	2.4	Holding high expectations in Computer Science	1.3,1.4	1a,1e	Friday 27 September 2024 0930 – 1600 To be confirmed
	2.5	Holding high expectations in Computer Science	3.2,7.7 Consider Standard 3	1a,7f Consider Standard 4	Friday 27 September 2024 Afternoon To be confirmed
Week	**Session Number**	**Theme 3 | The Effective Teaching of Computer Science**	**Learn That**	**Learn How**	**Venue and Timings**
6	3.1	The importance of cognitive load theory in the teaching of Computer Science	2.4,2.9,4.2	2b,2c,4a	Friday 4 October 2024 Morning To be confirmed
	3.2 & 3.3	Direct instruction or enquiry led approach Introducing new knowledge	2.4,2.9,4.2 2.4,2.9,4.2	2b,2c,4a 2b,2c,4a	Friday 4 October 2024 Afternoon To be confirmed
7	3.4	Ensuring pupils remember Computer Science	2.7,2.8,4.3,4.4 4.5	2h,4b,4j	Friday 11 October 2024 Morning To be confirmed
	3.5	Developing pupil's Computer Science skills	3.2,3.5,4.3,4.4 4.5,4.8	3b,3d,4b,4c,4d 4e	Friday 11 October 2024 Afternoon To be confirmed
10	3.6	Additional session if required			
11	3.7	Strategies for effective talk in the Computer Science classroom	4.6,4.7,4.8,4.9	4e,4l,4m,4n,4o	Friday 15 November 2024 Twilight | 1400 – 1530 Online
12	3.8	Guided and independent practice to support pupils to produce high quality Computer Science writing	4.6,4.7,4.8,4.9	4e,4l,4m,4n,4o	Friday 22 November 2024 Twilight | 1400 – 1530 Online
13	3.9	Using metacognitive strategies to build increasingly complex mental models of Computer Science	4.6,4.7,4.8,4.9	4e,4l,4m,4n,4o	Friday 29 November 2024 Twilight | 1400 – 1530 Online
		Theme 4 | Assessment and Feedback in Computer Science	**Learn That**	**Learn How**	
17	4.1	What do we assess in Computer Science Planning for effective assessment in Computer Science	6.1,6.2,6.3 6.3,6.4	6e 6a,6c	Friday 10 January 2025 Morning To be confirmed
	4.2	What do we assess in Computer Science Planning for effective assessment in Computer Science	6.1,6.2,6.3 6.3,6.4	6e 6a,6c	Friday 10 January 2025 Afternoon To be confirmed

18	4.3	The Art of Questioning: A Computer Science teacher's most powerful tool	4.6,4.7.5.3	4o	Friday 17 January 2025 Morning To be confirmed
19	4.4	Challenging common misconceptions in Computer Science	2.6,3.4	2e,2f,3g,6d,6e 6g	Friday 24 January 2025 Morning To be confirmed
	4.5	Making high quality feedback in Computer Science manageable	6.5,6.6,6.7	6i,6j,6k,6n,6p	Friday 24 January 2025 Afternoon To be confirmed
20	4.6	Summative Assessment in Computer Science	6.3,6.4	6b,6c	Friday 31 January 2025 AM To be confirmed
Week	**Session Number**	**Theme 5 | Adapting Computer Science**	**Learn That**	**Learn How**	**Venue and Timings**
24	5.1 (i)	The role of Computer Science in helping pupils overcome barriers to learning	5.1,5.2,5.6, (8.5)	5b,5c,5f, (5g)	Friday 7 March 2025 Twilight | 1400 – 1530 Online
27	5.1 (ii)	The role of Computer Science in helping pupils overcome barriers to learning	5.1,5.2,5.6, (8.5)	5b,5c,5f, (5g)	Friday 28 March 2025 Twilight | 1400 – 1530 Online
30	5.2	Adaptive Teaching in Computer Science	5.3,5.4, (8.5)	5a,(5g)	Friday 2 May 2025 Twilight | 1400 – 1530 Online
31	5.3	Providing effective scaffolds in Computer Science	4.4, 5.5, (8.5)	4b,4d,5b,5l, (5g)	Friday 9 May 2025 Twilight | 1400 – 1530 Online
32	5.4	The SEND code of practice and the graduated response in the Computer Science classroom	5.5,5.7,8.5	5a, (5g)	Friday 16 May 2025 Twilight 1400 – 1530 Online
		Theme 6 | Enriching Computer Science	**Learn That**	**Learn How**	
34	6.1	Enriching Computer Science 1	Standard 3	Standard 3	Friday 6 June 2025 Twilight 1400 – 1530 Online
36	6.2	Enriching Computer Science 2	Standard 3	Standard 3	Friday 20 June 2025 Twilight 1400- 1530 Online
39	6.3 & 6.4	Enriching Computer Science 3 and 4	Standard 3	Standard 3	Friday 11 July 2025 Morning To be confirmed

	6.5	Enriching Computer Science 5	Standard 3	Standard 3	Friday 11 July 2025 Afternoon To be confirmed

Setting SMART Goals



Part of becoming a teacher is seeking opportunities to practise, receive feedback and improve. The target setting system below is in place to help you effectively synthesize the knowledge taught in your subject sessions and identify areas for development in your own practice. This document will enable you and others to track your progress across the course.

The SMART targets also mirror the types of recordkeeping that many schools ask their teachers to keep in their early career teaching to collect evidence of their progress. These need to be kept up-to-date after each subject session throughout the course as part of your professional practice.

In order to make effective use of content taught in subject sessions, it is important to identify how new content will be implemented into your daily teaching practice. Your subject sessions are designed to be rich in professional discussion and analysis of live teaching tools, to support you in solidifying the learning you need to set comprehensive targets and explain a measurable way in which you will implement the evidence in lessons.

Here is a step-by-step guide on how to complete a SMART target:

1. Specific: Define what pedagogical research you have learnt and summarise key findings from the evidence.
2. Measurable: Using your subject lens, identify what this evidence informed research looks like in your subject.
3. Achievable: Think about how you will apply this knowledge to your teaching practice and set two targets that will improve your pedagogy.
4. Relevant: Note down some professional discussion questions that you will ask your colleagues in your placement school. These questions are to help further extend your understanding of how the research / strategies discussed in your subject session are applied in your subject.
5. Timely: List your key take away knowledge from the subject session. This could include answers to your questions or key information that has influenced your teaching practice.

Swift Teacher Training | Lesson Observation of Expert Colleagues – Trainee Exemplar

Teacher		**Subject / Key Stage**	
Teaching group		**Lesson Topic Focus**	
Time		**Date**	
Focus of observation			
Lesson objective(s)			

Managing Behaviour and High Expectations	Pedagogy How Pupils Learn Classroom Practices Adaptive teaching	Curriculum	Assessment	Professional Behaviours

What does the teacher want the pupils to remember at the end of the lesson?	**Subject knowledge** required for teaching the lesson
Teaching: How is the teaching using effective pedagogical strategies to introduce and scaffold new concepts / meet the lesson objective.	**Learning:** What new knowledge or skills are the pupils developing during the lesson? How does the teacher know what progress is being made by all pupils?
Classroom management: What does the teacher do to manage behaviour positively?	
What theories of teaching and learning are evident in this lesson that you have been learning about in the Provider-Led and Subject Knowledge sessions?	

Swift Teacher Training | Lesson Observation of Expert Colleagues

Teacher		**Subject / Key Stage**	
Teaching group		**Lesson Topic Focus**	
Time		**Date**	
Focus of observation			
Lesson objective(s)			

Managing Behaviour and High Expectations	**Pedagogy How Pupils Learn Classroom Practices Adaptive teaching**	**Curriculum**	**Assessment**	**Professional Behaviours**

What does the teacher want the pupils to remember at the end of the lesson?	**Subject knowledge** required for teaching the lesson
Teaching:	**Learning:**
Classroom management:	
What theories of teaching and learning are evident in this lesson that you have been learning about in the Provider-Led and Subject Knowledge sessions?	

Short Placement | Suggested Areas for Observation (this list is not exhaustive)

Teacher Actions	Pupil Actions
Teaching: What tasks have been set? How are they set-up? How much time is provided?	**Learning:** What new knowledge or skills are the pupils developing during the lesson? How does the teacher know what progress is being made by all pupils?
Classroom management: What does the teacher do to manage behaviour positively? How are resources distributed and collected?	**Classroom management:** How are the students engaging with the task? Are they on or off-task? What is contributing to the engagement/lack of engagement? What knowledge are the students collecting? With what skills are the students engaging?
Teaching: What explicit and implicit instructions does the teacher use?	How do pupils respond to these Teacher Actions?
Classroom management: How does the teacher use praise and other positive language? How does the teacher use pupils' names? How does the teacher use sanctions?	
Classroom management: Sketch the layout of the room, noting where the pupils sit.	
Teaching: Make a note of any questions the teacher uses about subject knowledge.	
Classroom management: How does the teacher use questioning to manage behaviour?	
Teaching: How does the teacher introduce new concepts or knowledge?	
Teaching: Make a note of how the teacher gets the pupils into the classroom, how they move from one activity to another, and how they get the pupils to leave the lesson at the end.	
Classroom management: How does the teacher indicate that they are ready to move the learning on?	
How Pupils Learn: How does the teacher provide opportunities for retrieval practice?	

Long Placement | Suggested Areas for Observation (this list is not exhaustive)

Teacher Actions	Pupil Actions
How Pupils Learn: How does the teacher provide/use: - appropriate modelling, scaffolding and strategies to develop metacognition - lesson time effectively	How do pupils respond to these Teacher Actions? What is the impact on pupil learning / behaviour?
Classroom Management: How does the teacher demonstrate: - clear communication of high expectations - use of specific praise and visible behaviour cues - rewards and sanctions used in line with policies	
Subject Knowledge: How does the teacher demonstrate: - knowledge of national and wider curriculum. - inclusion of subject-specific pedagogical approaches - awareness of subject misconceptions and strategies to address them - development of students' literacy	
Assessment: How does the teacher provide opportunities for: - formative assessment strategies used to support learning - prior assessment factored into planning - feedback given to support children's progress - opportunities for children to reflect on progress	
Adaptive Teaching: How does the teacher demonstrate: - awareness of diverse learning and development needs, abilities, dispositions and backgrounds - adaption of learning to support children with additional needs - understanding of individual needs and responding accordingly in a supportive manner	
Professional Behaviours: How does the teacher: - promote positive values and attitudes, including scholarship and a love of learning	

- work professionally and collaboratively with colleagues during the lesson	

Assessment Point Timetable

	SWIFT Teacher Training Focus	Date	Assessed by:
SWIFT Check-In	Attendance and time keeping Professional communication Organisation and initiative Professional Behaviours and Relationships	Week 10	Mentor
AP1	Positive Behaviour Management and High Expectations (Strand 1) Professional Behaviours (Strand 5) Subject Knowledge (Strand 3)	18/11/24 – 2/12/24 Autumn Term	Subject Knowledge or Phase Lead Mentor Trainee
AP2	How Pupils Learn (Strand 2) Classroom Practice (Strand 2) Positive Behaviour Management and High Expectations (Strand 1) Subject Knowledge (Strand 3) Professional Behaviours (Strand 5)	3/3/25 – 24/3/25 Spring Term	Subject Knowledge or Phase Lead Mentor Trainee
AP3	Adaptive Teaching (Strand 2) Assessment (Strand 4) Positive Behaviour Management and High Expectations (Strand 1) Subject Knowledge (Strand 3) Professional Behaviours (Strand 5)	28/4/25 – 12/5/25 Summer Term	Subject Knowledge or Phase Lead Mentor Trainee
AP4	Final decision for QTS This process draws all the evidence together to make a judgement about a recommendation for QTS	June 2025 Summer Term	SWIFT Teacher Training Central Leadership Team

What will be assessed	Evidence	Timings
StepLab | Our Professional Development Platform	Feedback on lesson observations Weekly targets have been set Observation of expert teachers are taking place Targets are being achieved Learning journal complete including next steps to improve practice Professional Behaviours are met	Ongoing development
Subject Audit	Use subject audit to track subject knowledge development	Ongoing development
Formal Observation	Full lesson focusing on the assessment points above	One full lesson up to the maximum of one hour's observation.
Expert Feedback	Trainee receives clear and effective feedback and mentoring from expert colleagues Trainee makes effective use feedback and take steps to improve practice The Subject Knowledge Lead and Mentor will work with the trainee to set 3 to 4 targets.	30 minutes
Professional Conversation	After the formal observation there is an opportunity for professional dialogue around the trainee's progress. During the conversation, the trainee will consider their progress against the curriculum strands and the impact of this on their practice.	30 minutes

StepLab and Instructional Coaching

We use a professional learning platform, Steplab, to support instructional coaching which is built by teachers, for teachers. This platform is used in your weekly mentor sessions during school placements.

Steplab allows us:

- To track and monitor progress on a weekly basis.
- Show progress against the Training Programme Curriculum.
- Understand areas of strength and development.
- Use a common language to ensure that everyone is aligned on what the trainees' areas for development are.

Steplab is the online tool that all trainees use to track and monitor progress throughout the Training Programme. Steplab will provide evidence of trainees' development and therefore can be used to assess against the Teachers' Standards in the final assessment.

All trainee development, including development goals, observation feedback, support plans and instructional coaching, will be recorded through Steplab.

Development goals and actions

Mentors will set development goals and actions throughout school placements. Development goals have a specific developmental focus, which will then be broken down into several key actions to help trainees achieve the goal. Mentors and trainees can add comments and upload files to their development goals. This will allow trainees to evidence key pieces of work.

Weekly action steps

The weekly action steps form an important part of the instructional coaching that mentors will carry out with trainees. Mentors will lead on the weekly action step cycle with their trainees. Mentors will set specific areas of practice for the trainees based on their areas of development, which will then be discussed in mentor meetings.

After the assessment point the trainee will complete their Learning Journal and upload it to Steplab.

PGCES with University of Nottingham

The modules (20 Masters credits each)

Module 1 | 'Understanding Contexts' | PGCE Days 1, 2, 3

This is about national and international contexts for education and considers ideas from the philosophy of education about the purposes of education in different settings. This introductory module introduces a philosophical, comparative and observational focus which runs throughout the course. Units within the module include 'Purposes of the School Curriculum', 'Understanding Educational Systems' and 'Understanding the Classroom'.

- **Assessment**

Trainees will carry out this assignment in the context of the subject or phase they hope to teach and select a key stage to focus on. Trainees' assignments should be approximately 4000 words in length.

Module 2 | 'Understanding Learning and Teaching' | PGCE Days 4, 5, 6, 7

This focuses on broad areas within the field of learning theory including constructivism, socio-constructivism and metacognition. Critical approaches are encouraged as well as a grasp of the practical importance for teachers in understanding how children learn. The module covers: questioning, collaborative learning, talk for learning, planning for learning, assessment, differentiation, special educational needs and inclusion, and English as an additional language.

- **Assessment (PGCE Day 7)**

Presenting a critical commentary informed by learning theory, trainees will present to their peers and the assessing tutor, keeping strictly to 15-minutes with a further 5 minutes for questions. Trainees will submit:

- a reflective summary of no more than two sides of A4, with annotated and cross-referenced appendices (planning and assessment documents);
- a copy of the slides including presentation notes;
- an annotated reference list.

Module 3 | In 'Inquiring into Educational Experience' | PGCE Days 8, 9

Trainees plan and undertake a small-scale inquiry in their own classroom which reports and reflects upon the execution and findings of the project. In preparation for the research and data-generation processes, the module considers methodological principles of practitioner research. Guidance will be offered on the planning, writing and presentation of the study, including recommendations for relevant academic and professional literature for background reading.

- **Assessment**

Trainees will need a precise subtitle that states their specific inquiry focus.

This assignment encourages trainees to conduct an inquiry into an educational issue in their chosen subject or phase. Trainees will engage with ideas of education for social justice and develop their own strategies to promote social justice in, and through, their teaching. The word count is approximately 4000 words.

PGCE Day 10 concludes the course by focusing on contemporary and emerging understandings of Learning Science and School Leadership.

Overall Assessment criteria

Your assignments will be assessed against the following generic criteria, used for all postgraduate taught courses:

- Organisation
- Structure
- Focus & relevance
- Knowledge and understanding
- Knowledge of topic
- Breadth of understanding
- Argumentation
- Depth of treatment
- Analysis
- Reflection
- Criticality
- Application
- Links to professional practice
- Well-grounded proposals
- Constraints considered
- Creativity & originality
- Presentation, language and referencing
- Presentation conventions
- Referencing style
- Clarity of expression

All assignments provide evidence that can contribute to their assessment against the Teachers' Standards.

Specifically, for the PGCES course, assignments will also be assessed against the following criteria:

- evidence of understanding of the field of inquiry
- evidence of a structured and coherent discussion
- attempts to synthesise arguments drawn from the literatures consulted
- appropriate use of professional and academic literature, including: evidence of relevant reading (well-integrated), referencing and use of quotations
- evidence of personal reflection, criticality and professional learning
- confident use of technical aspects of writing, including: clear, logical structure; fluent style in correct register; accurate presentation (grammar, spelling punctuation)

Roles and Responsibilities at a Glance

Schools should:

- provide effective school-based placements;
- ensure mentors are sufficiently well trained, have an excellent understanding of the provider's curriculum and the evidence base that underpins it and are given sufficient time to provide structured feedback designed to improve the trainee's knowledge, skills and practice;
- release mentors to attend all training and development opportunities provided by the ITT provider;
- provide access to other expert colleagues across the school and allow time for the trainees and expert colleagues to: observe and deconstruct; rehearse and refine; discuss and analyse teaching, strategies and pedagogy;
- guide and support trainees so that they have a positive impact on improving outcomes for the pupils they teach;
- contribute to the design of a coherent ITE curriculum and provide school-based training opportunities to trainees;
- identify and address trainees' needs, setting targets which support them to make sustained progress;
- adhere to the terms of the Partnership Agreement and the provider's code of conduct.

Trainees should:

- utilise all aspects of their education and training: school and intensive placements, centrally provided training, academic research and independent study, in order to secure their progress – both as reflective practitioners and as professional, high quality teachers;
- take lead responsibility for recording weekly discussions with their mentors;
- understand and take responsibility for the impact of their teaching on improving outcomes for the pupils they teach;
- uphold the standards expected of the teaching profession, as set out in the Teachers' Standards;
- adhere to the provider's code of conduct.

Roles and Responsibilities at a Glance 1: Schools, Trainees, Mentors

Mentors should:

- engage fully in all training and development opportunities provided by the partnership;
- ensure they dedicate sufficient time to the support and nature of their trainee teacher(s);
- design opportunities for trainees to practice skills, discuss and analyse with expert colleagues and observe expert colleagues and deconstruct their approaches;
- demonstrate a confident working knowledge of the provider's ITE curriculum and how it is built on the Core Content Framework and its underlying evidence base;
- provide clear, consistent and effective mentoring;
- provide feedback to the providers on the progress of their trainee;
- identify and support trainees who may be struggling;
- maintain open communication with lead mentors and provider's staff:
- adhere to the provider's code of conduct.

Providers, strategically, should:

- exercise a duty of care for all their trainees, their personalised training needs and their well-being, acknowledge the need to nurture the next generation of committed, resourceful, high-quality teachers;
- provide a safe and inclusive environment in which to train to teach;
- design and implement ethical and inclusive recruitment and selection processes;
- recruit, train and sustain a highly skilled mentor workforce to support the progress of trainee teachers;
- support trainees with respect, being mindful of the stage of their training and how this may impact on the challenges they might be facing;
- ensure their programmes adhere fully to the ITT criteria and supporting advice;
- ensure that trainees are equipped to enjoy the rewards and challenges of the teaching profession;
- develop, share and ensure all relevant parties have signed clear Partnership Agreements and a code of conduct;
- remain mindful of the workload their processes may create for trainees and those that support them, and design systems which are as streamlined as possible, whilst remaining 'robust'.

Providers, practically, should:

- design and implement high-quality evidence-based curricula, structured around phase and subject, which sequence trainees' learning appropriately for the content in which they are training to teach, and which include periods of intensive training and practice, as set out in the 2024 Quality Requirements;
- ensure the ITT Core Content Framework is delivered in full through their curricula;
- design and implement high-quality mentor curricula which meet the expectations set out in the 2024 Quality Requirements;
- ensure that staff contributing to curriculum design and facilitation have the necessary expertise in their subject, phase and/or broader area(s) of the responsibility (e.g. mentor training, trainee well-being, safeguarding, EDI, etc.)
- work with all members of the partnership to ensure that all trainees make sustained progress, providing additional, tailored support when necessary;
- monitor trainee progress through robust and accurate formative and summative assessment processes, which are subject to suitably rigorous internal and external moderation;
- when making a final judgement about the award of the QTS, recognise that the Teachers' Standards need to be applied as appropriate to the role and context within which a trainee or teacher is practising and in a way that is consistent with what could be reasonably be expected of a trainee teacher prior to the award of QTS;
- adhere to the provider's code of conduct.

Roles and Responsibilities at a Glance 2: Providers

Media – Privacy Settings

The digital age has ushered in an unprecedented era of connectivity and access to information for students of all ages. However, with the good comes the bad, and navigating the internet safely and responsibly is a crucial skill that all students must develop. Many schools have responded to this need by implementing a variety of policies and programs focused on internet safety and digital citizenship. Web filters and internet audits allow schools to monitor what students are viewing online during school hours and block inappropriate or dangerous content. Pastoral programmes often include lessons on topics like cyberbullying, protecting personal information, avoiding online predators, and managing screen time.

Some schools actively leverage sites like Facebook to communicate with students and parents in real time, encouraging engagement through social media. The intent is to teach students how to use these platforms safely and productively. Still, other schools ban social media entirely on school grounds, aiming to limit distractions and risky behaviour. All of this highlights how critical it is for students and parents to understand and follow their school's unique internet use policies.

The digital world holds countless benefits for learning and growth, but also many dangers - by partnering effectively with students and parents, schools can strike the right balance.

Social media has become an inescapable part of modern life, and we ask that you navigate its pitfalls carefully. With a few clicks, students can easily access a teacher's online presence and personal information never meant for the classroom. This makes it crucial for teachers to audit their security settings and exercise judgment in what they share online. Too easily, content can be taken out of context, jeopardising a teacher's career. Many schools and colleges now routinely search social media profiles of potential hires, screening for any red flags.

Mobile Phone Use

All schools will have their own mobile phone policy for students and staff, please ensure when on school placements you follow this carefully.

Generally, a policy will follow these guidelines:

SWIFT trainees may bring mobile phones onto the school site on the understanding that the personal mobile phone:

- is used only in the staffroom, outside of the school gate, or in office spaces when no students are present.
- only used during break times and at either end of the school day.
- must not be used to take photos of students
- should never be used to contact or exchange information with parents.

Glossary of Terms

- **AB - Appropriate Body -** An organisation responsible for the quality assurance and verification process of statutory teacher induction. An Appropriate Body makes the final decision, based on a Headteacher's recommendation, as to whether an ECT has satisfactorily met the Teachers' Standards.
- **Adaptive Teaching -** Adaptive teaching is an approach a teacher will use to continually assess the strengths and needs of learners and adapt their teaching accordingly to ensure all learners can meet expectations.
- **BEd - Bachelor of Education -** A Bachelor of Education (BEd) is an Undergraduate professional teacher training degree with Qualified Teacher Status (QTS). BEd courses are mainly taken by primary school teachers, although it is possible to teach another Key Stage.
- **CCF - Core Content Framework -** ITT Core Content Framework, designed by the DfE, sets out the minimum entitlement for all trainee teachers and the content that ITT providers must include in their programmes.
- **CPD - Continuing Professional Development -** Effective continuing professional development for teachers is essential to becoming confident and competent as a teacher and ultimately providing high-quality teaching. It allows teachers (and other teaching staff) to stay up to date with their specialism and develop professionally.
- **DBS - Disclosure and Barring Service -** DBS checks in education are an essential safeguarding tool to ensure the safety and well-being of children and young people. If a person is to work in a nursery, school or college, they will require an Enhanced DBS and a child barred list check no matter what their role is.
- **DfE - Department for Education -** The Department for Education is responsible for children's services and education, including early years, schools, higher and further education policy, apprenticeships and wider skills in England.
- **EAL - English as an Additional Language -** A learner of English as an additional language (EAL) is a pupil whose first language is other than English.
- **ECF - Early Career Framework -** The Early Career Framework (ECF) is a statutory two-year package of high-quality professional development (training, support, and resources) for schools. It sets out what Early Career teachers (ECTs) are entitled to learn when they start their careers.
- **ECT | Year 1 or Year 2 - Early Career Teachers -** The term early career teacher replaced the term NQT (newly qualified teacher) in 2021. An ECT will have completed their initial teacher training and can then begin their ECT induction period of two years. They are known as ECT Year 1 or Year 2.
- **Enrichment Week -** A week on our SWIFT teacher training programme where you can explore a particular theme more in depth, e.g. SEND.
- **EYFS - Early Years Foundation Stage -** The early years foundation stage sets the framework for education for children from birth up to 5 years.

- **GDPR - General Data Protection Regulations -** Everyone responsible for using personal data has to follow strict rules called 'data protection principles' and must ensure personal information is used fairly, lawfully and transparently. The Data Protection Act 2018 is the UK's implementation of the General Data Protection Regulation (GDPR). (include link to GDPR policies)
- **HEI - Higher Education Institution -** A higher education Institution is third level (tertiary) education at a university and further education college. As an ITT provider an HEI offers undergraduate and postgraduate teacher training courses.
- **IEP - Individual Education Plan -** An IEP is a detailed plan that sets out targets and strategies to help a child with special educational needs learn.
- **ITaP - Intensive Training and Practice -** Distinguished from school placements, Intensive training and practice focuses on a single or small number of areas, very intensely, to ensure that trainees make rapid progress in understanding and application. Intensive training and practice should also build powerfully the link between evidence-based theory and practice.
- **ITT - Initial Teacher Training -** Initial Teacher Training is a university-led or school-based teacher training route.
- **KS1-5 - Key Stage 1-5 -** The National Curriculum is organised in to blocks of years called Key Stages: Key Stage 1 | Years 1 - 2; Key Stage 2 | Years 3 - 6; Key Stage 3 | Years 7 - 9; Key Stage 4 | Years 10 - 11; Key Stage 5 | Years 12 - 13 or Post 16.
- **LA - Local Authority -** A Local Authority is an organisation officially responsible for all the public services and facilities in a particular area. State Schools receive funding through their Local Authority or directly from the Government depending on the type of school.
- **Lead Mentor -** Lead Mentors train and deploy mentors in school to undertake their important roles in the training of teachers. They will receive intensive training so that they have a deep knowledge of the curriculum, the evidence base which underpins it, and the organisation and delivery of the curriculum across the accredited provider's network.
- **MAT - Multi Academy Trust -** A group of primary/secondary state schools in England funded by Central Government but run as independent schools in partnership with each other.
- **MFL - Modern Foreign Languages -** Languages that are spoken at the present time, such as Spanish, French or German, studied by someone when they are not their own language.
- **NPQ - National Professional Qualification -** NPQs are a range of professional qualifications for teachers and leaders in school to develop their knowledge, skills and behaviours.
- **OFSTED - Office for Standards in Education -** Ofsted inspect schools and other services providing education services to learners of all ages.
- **Pedagogy -** Pedagogy is a term that refers to the way teachers teach, both in practice and in theory.
- **PGCE - Postgraduate Certificate of Education -** The PGCE is an academic award which universities award alongside QTS. In England, this can be either on a traditional university-led teacher training course or school-led teacher training. Only a university can offer this award, as they have degree awarding powers. On our programme we will be working with the University of Nottingham so that our trainees can gain the professional award of PGCE alongside their QTS award.

- **Phase -** Across the UK there are five phases of education: Early Years, Primary, Secondary, Further Education and Higher Education.
- **PPA - Planning, Preparation and Assessment -** PPA time was introduced in 2005 to help ease teachers' workload to plan and prepare lessons and work on assessments for the children they teach. The aim of PPA time is to reduce the number of hours that teachers need to put into planning lessons and marking during evenings and at the weekend. Teachers are entitled to 10% of regular teaching time during the normal working week as PPA.
- **PSHE - Personal, Social and Health Education -** As a subject, PSHE aims to provide children with the knowledge and skills to keep themselves happy, healthy and safe, as well as to prepare them for life and work.
- **QTS - Qualified Teacher Status -** Qualified Teacher Status (QTS) is the qualification legally required to teach in a maintained school or non-maintained special school in England.
- **Safeguarding and Welfare** are the terms that are used in the UK that mean to ensure the safety and wellbeing of all individual people - especially including children and vulnerable adults. All trainee teachers and school staff receive regular training in this area.
- **SCITT - School-Centred Initial Teacher Training -** School-Centred Initial Teacher Training (SCITT) programmes are led by schools or groups of schools that work in close partnership. SWIFT Teacher Training is a SCITT and this means that we are able to confer the award of Qualified Teacher Status (QTS) and that we can train teachers in our schools. We work closely with the University of Nottingham for trainees to also gain a PGCE. A SCITT means that the trainee teacher spends the vast majority of their time within a school setting to be immersed in the environment as they train and learn the profession.
- **SEND - Special Educational Needs and Disabilities -** Children and young people who have special educational needs or disabilities require special educational provision either in mainstream or specialist schools.
- **SENCO - Special Educational Needs Coordinator -** SENCos are members of teaching staff who are responsible for special educational needs within a school.
- **SKE - Subject Knowledge Enhancement -** SKE courses make teaching an accessible and viable career path to a range of graduates. They are designed to bring a candidate's knowledge of a subject up to teaching level.
- **SLT - Senior Leadership Team -** The Senior Leadership Team (SLT) is responsible to the Governing Body for the leadership and management of the school. Each member of the team has specific responsibilities and depending on the size of the school usually includes a Headteacher/Head of School, Deputy Headteacher(s), Assistant Headteachers and a Business Manager/Bursar.
- **STEM - Science, Technology, Engineering and Maths -** STEM refers to any subjects which fall under these four disciplines.
- **TA - Teaching Assistant -** Teaching Assistants support teachers and help children with reading, writing and learning activities.
- **TLR - Teaching and Learning Responsibility -** Classroom teachers who take on additional leadership and management responsibilities could be awarded a TLR payment.
